# LED LIGHTS

By stimulating daylight with the right LED panels and the use of realistic high-resolution pictures, you will really feel like you are working outside when you are actually inside, or feel like you are being treated under a blue sky.

The colour temperature of our light matches daylight. This makes it seem like you are actually looking outside through a very real window, and visitors and employees also experience the positive effects of daylight when they are inside.

Sky Ceiling Panels was founded in the domain of healthcare, and in response to the question if it would be possible to think of a visually attractive solution as an alternative for the dull white ceilings patients are always staring up at.

After rise in Sky Ceiling popularity as most beautiful cloud ceilings in the European and UK market. Crystal-clear image in an ultra-thin LED panel, for a competitive price. With our cloud ceilings, we add an extra experience to every room.

## 5 REASONS TO CHOOSE A LED SKY CEILING

- A positive distraction during treatment, meeting or visit.
- More energy for you, your colleagues and your visitors.
- The sense of outdoors alleviates anxiety and stress.
- A visit to your institution or company will be a more positive experience.
- A visual wow-factor within your company or institution.

# Sky Ceiling

Applied in corporate, recreational and medical spaces: our standard product is the ideal solution for a realistic cloud ceiling with daylight experience for a very reasonable price.

With the standard formats 60×60, 120×60 and 120×120, the ultra-thin LED-panels are very easy to implement in the suspended ceiling. The SKY CEILING PANEL is standard cloud ceiling can be executed with a picture of your own or one of our crystal-clear pictures.

Aluminium frame ensures efficiency of thermal performance in aluminum is comparatively higher than other materials and thus we have adapted this in our panels as well.

## Standard dimensions

By default, our panels are available in the suspended ceiling dimensions 60×60, 60×120 and 120×120 cm.

## Photography

You can choose between our crystal-clear pictures, online image databases or submit your own design. Our designers can always create the desired effect.

## Ultra Wide 160° Beam Angle

Viewing angle is all what brings the appreciation for you product and thus we have achieved this

## Glossy or anti-reflective

With us you can choose whether you want the panels glossy or anti-reflective.

## Dimmable

All of our panels are dimmable by default. We would love to hear from you which way you would prefer this to work. For example, think of 0-10V, DALI and by remote control.

## Simple installation

Our Standard panels are made for the suspended ceiling and provide a 'Plug and Play' solution for the light. This makes it possible for our panels to be installed within one lunch break.

# Custom

Are you looking for a unique cloud ceiling with a deviating dimension, a different colour profile or a special request for its finish? With our products we deliver customisation, we would love to think along with you based on our confidence.

We closely look while panels are manufactured and have access to the most modern equipment, so the possibilities are endless. Let yourself be inspired by the most common adjustments below or contact us to discuss the possibilities.

## Different led

By default, all of our panels are made with Daylight LED, but the possibilities are endless.

## Other colour profile?

By default, our products are equipped with a white filter. If you would like a different colour, that is no problem at all.

## Extra lighting

Some situations require more light, which is no problem with our Plus panels.

## Deviating dimensions

Aside from our standard dimensions, we can also make panels in any dimensions you choose.

## Customization

SKY CEILINGSPANELS images can be changed at any point in future.  
so customization is no problem at all.

## No suspended ceiling

If you have no suspended ceiling,  
there are various possibilities.

# SKY WINDOW

Applied in corporate, recreational and medical spaces: our standard product is the ideal solution for a realistic cloud ceiling with daylight experience for a very reasonable price.

With the standard formats 60×60, 120×60 and 120×120, the ultra-thin LED-panels are very easy to implement in the suspended ceiling. The LED SKY WINDOW are window /vertical tiles that can be executed with a picture of your own or one of our crystal-clear pictures.

Aluminium frame ensures that panel stay strong to little wear and tear while placing and removing panels for various purposes.

## Standard dimensions

By default, our panels are available in the suspended ceiling dimensions 60×60, 60×120 and 120×120 cm.

## Photography

You can choose between our crystal-clear pictures, online image databases or submit your own design. Our designers can always create the desired effect.

## Ultra Wide 160° Beam Angle

Viewing angle is all what brings the appreciation for you product and thus we have achieved this for you.

## Glossy or anti-reflective

With us you can choose whether you want the panels glossy or anti-reflective.

## Dimmable

# SKY CEILING PANEL Photo Art

Empty walls are history with SKY CEILING PANEL Photo Art, the most beautiful art combined with our daylight LED lighting. In collaboration with the artists, we can produce an artistic art with a thin frame to go on the wall, with the same unique qualities as our other ceiling products.

By default our Photo Art comes in a modern, white frame, and it fits in every room, enabling full enjoyment of every piece of art. Whether it is a picture from the archive of the Dutch Photo Museum, or the latest masterpiece made by one of the artists from our network.

We have the right image for every living room, office space or institution. If not? We will go looking for the desired image, and bring it to life with SKY CEILING PANEL Photo Art!
